On the other hand, the self-paced nature of online courses requires students to be highly disciplined and proactive in managing their time and assignments.

As a result, students often face the following challenges:

- **Time Management:** Balancing coursework, exams, extracurricular activities, and personal responsibilities can be overwhelming.
- **Complexity of Assignments:** Many courses, especially in nursing, require an in-depth understanding of both theoretical knowledge and practical application.
- **Pressure to Perform:** With the increasing competitiveness in education, students are expected to meet high academic standards, which can lead to stress and burnout.

This is where tailored online class help solutions become invaluable.
